

QA3

Patient Trolley System

Designed following comprehensive research into patient trolley function and ergonomics

NEW

QA3

Patient
Trolley

The QA3 version 3.0 Variable Height Patient Trolley: ideal for patient transport, examination and intubation in theatre and clinical areas. Designed for maximum patient comfort, the trolley is supremely manoeuvrable, compact, light weight and robust.

QA3

Emergency
Trolley

A specially designed version of the QA3 for Accident & Emergency departments is available. This will include an X-ray translucent platform, a medirail and the K8 pressure care mattress. Optional features include a monitor shelf and a Venturi suction system.

NEW

Innovative technology – practically applied

Anetic Aid Limited has been designing, manufacturing and supplying operating theatre equipment to hospitals in the UK and overseas for over 30 years

Renowned for innovation and high quality, the company believes in listening to customers and working closely with them to develop state-of-the-art products for a variety clinical environments. It offers a broad range of equipment including surgical and patient transport trolley systems, tourniquets, theatre furniture, operation table accessories and surgical instruments.

With its commitment to using the latest technology and materials for maximum functionality, the company is proud to be launching the latest generation of its QA3 Patient Trolley System: ideal for patient transport, examination and intubation - and with a special model available for radiography in theatre and emergency areas - it is designed for maximum ease of use combined with superior patient comfort.

Its compact construction is light weight yet robust, and its advanced steering system and ergonomically positioned pushing handles make it supremely manoeuvrable and easily guided by one person. Wider than the previous version by 100mm (although the overall trolley width has only increased by 30mm), it descends to an exceptionally low height, while unique foldaway cotsides store away under the mattress footprint to give a virtually zero transfer gap. The back rest is gas assisted for easy lifting and Trendelenburg (and reverse Trendelenburg) tilt can be operated instantly at any height from the head end.

SPECIALISING IN:

- Patient & Surgery Trolley Systems
- Operation Table Accessories
- Stainless Steel Theatre Furniture
- Surgical Instruments
- Electro-Surgical Accessories
- Tourniquet Systems
- Fibre Optic Instruments
- Service & Maintenance

The QA3 Version 3.0 Variable Height Patient Trolley: ideal for patient transport, examination and intubation in theatre and clinical areas.

Trendelenburg tilt – extremely smooth and controlled mechanism, allows rapid Trendelenburg to be achieved even when trolley is at its lowest height

Fixed transfusion pole – innovative quick release safety locking mechanism, integrates into either head or foot end of cotsides for easy access and storage

Vertically operated cotsides – store away under the mattress giving a virtually zero transfer gap. Spring counterbalancing allows effortless ease of operation

Cylinder trough – side loading for ease of access, suitable for a wide range of cylinder options including F, E or D

Gas assisted backlift – unique design, precision controlled, easy lift system for enhanced user and patient comfort

Hydraulic lift mechanism – exceptional low height capability, adjusted by means of independently operating pedals located on both sides of the trolley

5th wheel steering – unique mechanism which ensures trolley is highly manoeuvrable and easily guided by one person

Castors – polyurethane tyres offer low rolling resistance for high manoeuvrability, 150mm castors fitted as standard, 200mm optional.

GLOBAL DISTRIBUTION

A specially designed version of the QA3 for Accident & Emergency departments is available. This will include an X-ray translucent platform, a medirail and the K8 pressure care mattress.

QA3

Emergency Trolley

Patient comfort – exceptional low height capability and store away cot sides allow easy mount/dismount particularly for elderly patients.

Wider patient platform and pressure care mattress ensure maximum patient comfort. Improved ground clearance allows better access for patient hoists.

Pushing handles – four ergonomically positioned pushing handles give supreme manoeuvrability either with the patient lying flat or sitting up

Infection control – smooth moulded surfaces and acrylic capped vac formings enclose the trolley mechanics to minimise dirt traps. Anti-bacterial properties and innovative design ensure the product is easy to clean

LIFETIME WARRANTY

SUBJECT TO ANNUAL SERVICE

2 fixed transfusion poles – fitted as standard to emergency trolley

K8 pressure care mattress – manufactured from temperature-sensitive gel feel foam that moulds to the patient's body shape, relieving pressure by distributing the load as evenly as possible. Developed with the flexible properties of lycra, this outer material is anti microbacterial, water resistant, vapour permeable and latex free

X Ray translucent platform – full length radio translucent platform suitable for digital or traditional plates

Advanced braking – exceptionally stable platform, advanced single bar braking system that allows all four castors to be braked simultaneously from either side of the trolley

Optional Extras

200mm castor option
Ref No.: **21132**

Increased ground clearance assists departments with difficult terrain. Improved hoist access.

Emergency Venturi suction system
Ref No.: **21145**

Compact system offering oxygen and suction suitable for emergency situations.

Foot end stop/monitor shelf
Ref No.: **21150**

Removable device which locates to the trolley's foot end.

See back cover for additional extras →

ITEM

Cat No

QA3 Series version 3.0

QA3 Variable Height Patient Trolley (non X-ray)
c/w K8 pressure care mattress 21110

QA3 Variable Height Patient Trolley (with X-ray translucent platform and medirail)
c/w K8 pressure care mattress 21120

Standard features

- Hydraulic lift mechanism – exceptional low height capability
- Vertically operated cotsides – giving a virtually zero transfer gap
- Trendelenburg tilt – extremely smooth and controlled mechanism
- Latest castor technology – low rolling resistance for high manoevrability
- 5th wheel steering – easily guided by one person
- Pushing handles – ergonomically positioned
- Gas assisted backlift – horizontal to near vertical
- Advanced braking system – exceptionally stable platform
- Fixed transfusion pole – innovative quick release
- Cylinder trough – side loading
- K8 pressure care mattress
- Patient utility trays
- Rotating buffers – at head and foot ends
- Infection control – anti-bacterial properties and smooth moulded surfaces

Dimensions

- Overall length: 2130mm
- Overall width: 735mm
- Height range (Non X-ray) – 475mm to 775mm (excluding mattress)
- Height range (X-ray) – 520mm to 820mm (excluding mattress)
- Weight: 118kg
- Maximum patient weight – 250Kg (Please refer to user manual)

Optional extras

200mm castor option	21132*
Reverse Trendelenburg	21135*
Complete emergency Venturi suction system	21145
Foot end stop/monitor shelf	21150
Fixed pushing handles foot end	21155*
Spare transfusion pole removable	21160
Spare transfusion pole fixed	21161*
Grey cotside covers	21172
Child print cotside covers	21173
Department identification	21175*
K8 pressure care mattress	21185
X-ray tray	21195
X-ray tray guides	21196*

*Denotes factory fitted option – please specify at the time of ordering
